

TBM Racing Kawasaki SX-R 1500 Billet Scoop Grate

Contributed by Tim Bushman

Thursday, 21 January 2021 18:45 - Last Updated Thursday, 21 January 2021

Key Features:

- 100% billet aluminum construction offers superior strength and a perfect match to the hull and pump shoe geometry compared to inferior cast scoop grates.
- Race proven design that is IJSBA legal and a full 12mm depth ensures the pump will be loaded in the roughest water conditions.
- Rails are wider and 12mm deeper than the OEM scoop grate to enhance straight line tracking and corner grip.
- Designed specifically for the SX-R 1500 hull. This is not just a revised SX-R 800 scoop grate.
- Top loader wings are in the optimal position to maximize hook up and reduce porposing.
- Hard anodized for corrosion resistance.
- Superior speed and hook up in all water conditions thanks to over 8 months of testing and development.
