Dating back to 1994 when Yamaha introduced the Wave Raider this powder plant has proven its performance and reliability and is still the #1 choice among the free ride crowd. We set out to design the ultimate billet head kit that is durable, priced competitively and out performs everything ever produced for this engine.

Our billet head kit will increase cooling volume and heat dissipation and has 4 dome configurations available for standard up to 85.5mm pistons which are sealed by o-rings eliminating the need for a head gasket.
