Kawasaki Ultra Intercooler Support Bracket

\$199.95

Our Intercooler Support Bracket Kit is a must for every Ultra 250X/260X that is exposed to rough water conditions. Whether you ride on a windy lake or open ocean this support kit will prevent the intercooler and/or the mounting bracket from failing. This is a very common problem and a costly one so we went to work designing this kit to prevent this occurrence. Our kit includes all necessary hardware and installation instructions.
