Kawasaki 800 Charging Flywheel

\$699.95

Introducing our Kawasaki 800 Lightweight Charging Flywheel. As soon as we released our SX-R Total Loss Flywheel we began getting calls asking us when we would make charging flywheels. After over a year of testing we finally released the lightest most durable charging flywheel on the market. As with our total loss flywheel we are using the highest grade aircraft aluminum available and an engineered design that will withstand the most powerful engines and abusive riding. Weighing in at 2.2 pounds this is by far the lightest Kawasaki charging flywheel on the market.
