## 750/800 Aluminum Spacer Plate (0.062")

\$40.00

\*Limited Class Legal\*

Our .062" metal core base gasket is a must when competing in the 800 Limited Class. Significant gains (150 - 200rpm) in peak RPM translate to more speed when using this gasket. We highly recommend using our head with the Limited domes to optimize the benefit of this upgrade. When using the .062" base gasket in conjunction with our Limited domes you will net a broader powerband and 2-3 MPH in top speed depending on set up.
