Advent Ignition

\$695.99

Boost the performance of your 800 SX-R with an Advent Ignition system. This is the best way to optimize the modifications of your engine by running a timing curve specifically designed to coincide with our performance upgrades. We offer TBM designed curve sets, or we can program the curve of your desire for an additional \$75.00. Available with a remote switch option that allows you to toggle between the four pre set curves without opening the electrical box. Combine this ignition with our Lightweight Flywheel and hold on!
