Kawasaki 1100 Triple Angled Reed Spacer Kit

\$134.95

Finally a reed spacer kit for your Kawasaki 1100 triple! Our angled reed spacers position the reed cages in the optimal position for fuel atomization. Key features include a full 3 degrees of angle (1 degree more than our competitors) and integrated pulse fittings which, allow you to add a second and third pulse line without drilling your crankcases. This is an easy way to bolt on an increase in acceleration and mid range power. Compatible with stock or aftermarket cages, these spacers come complete with all necessary hardware and gaskets required for installation.
