Kawasaki SX-R Limited Big Bore Kit

\$595.00

When the IJSBA (International Jet Sports Boating Association) and APBA (American Power Boat Association) agreed to increase the displacement of the 800cc Limited class to 850cc we went to work developing an upgrade kit to accommodate this change. Our Limited Big Bore Kit includes all of the necessary parts to turn your almost 800cc (782cc) SX-R into an 830cc powerhouse! We provide the 84.5mm Wiseco pistons, OEM Kawasaki wrist pins, clips and bearings and your choice of special big bore domes (26cc, 27cc, 29cc), .062" spacer plate and all that's left is to take your cylinder to the local machine shop and have them bore to size. We can also bore your cylinder if you would like to ship it to us for that service. A substantial increase in bottom end and mid-range power is gained with this kit without sacrificing reliability.
