Tau Ceti Tornado Air Filter

\$56.00

Introducing the new Tau Ceti "Tornado" Air Filter. Designed and manufactured in the U.S.A, these bad boys are designed to give maximum performance. The main difference over the original Tau Ceti filter is that it comes with a swirl velocity cone with actually forces the air through into the carburetor giving you far better acceleration and throttle response. The outer ring is made from anodized aluminum, the filter element is conical shaped (2.5" tall). Designed to be used with all 2-stroke watercraft using the relevant carburetor adapter.

Cost is for one filter.
