## SX-R 800 Rear Sponsons

\$165.00

TBM Racing's SXR 800 Rear Sponsons, which enhance the handling of this already dominant ski. Used at the 2003 World Finals by Tim Bushman and Factory Kawasaki, they have been widely accepted as one of the few bolt on handling components for the SXR that actually work. Constructed of 6061-billet aluminum and use stainless steel inserts they come complete with all necessary hardware and instructions. Tim Bushman states, "At first glance these look like a very simple part, but we put extensive hours of testing into every aspect of the sponsons. I guarantee that the knock off's that will become available will overlook some very critical details."
